

IPG ALUMINIUM CONTAINER & TAYLORMADE CONTAINER

Container and Pallets made from Aluminum are applicable in all hygienic sensitive areas (GMP-/HACCP- regulations)

For example:

- Incoming goods
- Storage of outgoing goods and packing material
- Storage under temperature – warm or cold
- Storage (quarantine, risky raw materials, in between storage for half, bulk and finished goods, high rack storage)
- Medicine drugs are safely transported and stored on aluminum pallets as well as nutritional food, toxic drugs and waste.

Generally all our products are suitable for conveyor belts – with rolls, chains or high rack stors.

Our Aluminum pallets fulfil GMP and HACCP hygienic regulations. The products are certificated from TÜV and GS.

We produce pallets european size, as well as industrial and special sizes and customized sizes.

Taylormade pallet tops, skeleton boxes and container made from aluminum can be produced in all specifications or sizes.

Our Aluminum boxes with welded wave grid sides are the new products in our portfolio.

The Pharma-, Bio-, Cosmetics-, and Nutritional Industries are followed by high hygienic standards. An additional aspect for the daily business is safety in terms of manipulation of certain ingredients.

One solution are our fine-meshed wave grids.

Advantages of this new products:

- Availability in various mesh openings (20², 30², 40²)
- Safety in terms of manipulation because of narrow mesh openings
 - Low weight
 - Perfect for usage in STERILISATION
 - 100% stainless
 - All sizes and forms available

We are able to produce taylormade solutions for you.
